Power Bar, Metal Chassis, for 120 Volt Equipment, Max 15 Amp Total for 19" wide equipment racks

Back View

FEATURES

- **PB19R Series - 6 Outlet power bar, Optional Spike / Surge Protection**

The PB19R-15 Power Bar is designed to distribute 120 Volt AC power within a 19" equipment rack. The 19" metal chassied power strip is complete with 6 single outlets (great for multiple wall packs) and takes 1 rack space and is 4" deep. This bar is equipped with a 4.6m (15') long heavy gauge grounded power cord. This standard unit is CSA / UL approved.

The PB19R-15S is not UL or CSA listed, it has been modified at our factory to industry acceptable standards. The PB19R-15S has built in EMI, Spike and Surge Protection.

The PB19R Series has a power switch that is lighted, and also is equipped with a 15 amp circuit breaker.

The bar is finished in a semi-gloss black finish with black receptacles and a red power switch.

This bar is intended for indoor use only. Do not use in wet, oily or high temperature environments. This power bar is not intended for use with Aquariums, refrigerators, freezers, dehumidifiers, or air conditioners.
