ARCHITECTS AND ENGINEERS SPECIFICATIONS

MODEL G11W / G11SS / G11W-14

The flush ceiling baffle shall be an ARNSCOTT Model G11W / G11SS / G11W-14. The baffle shall be fabricated from one piece of steel (G11SS fabricated from 0.035" brushed stainless steel), finished in semi-gloss white powder paint (G11SS is not painted, natural brushed finish) and shall measure 32.4cm (12-3/4") round and 0.5cm (3/16") deep. The 8-inch loudspeaker shall mount on concealed studs. Four holes shall be provided to mount the baffle to ARNSCOTT Model E10, E10-5, E10-7L, E10-10L, E10S or E24, SE24 recessed enclosures. The G11W-14 mounts to AEG model E11 back-box. G11W-NP is the same as G11W, without perf of studs. This unit is designed to be a cover.

MODEL GA11W

The flush ceiling baffle shall be an ARNSCOTT Model GA11W. The baffle shall be fabricated from one piece of steel, finished in semi-gloss white powder paint and shall measure 32.4cm (12-3/4") round and 0.5cm (3/16") deep. The 8-inch loudspeaker shall mount on concealed studs. Concealed torsion springs shall be provided to mount the baffle to ARNSCOTT Model EA10, or special ordered EA10-10 recessed enclosures.

MODEL G11A

The flush ceiling baffle shall be an ARNSCOTT Model G11A. The baffle shall be fabricated from one piece of 0.030" aluminum, with a natural finish. G11AW is available as a special order with a semi-gloss white powder paint finish. The baffle shall measure 32.4cm (12-3/4") round and 0.5cm (3/16") deep. The 8-inch loudspeaker shall mount with four screws and nuts, the screw heads are visible from the front of the baffle. Four holes shall be provided to mount the baffle to ARNSCOTT Model E10, E10-5, E10-7, E10-10, E10S or E24 recessed enclosures.
