ARCHITECTS AND ENGINEERS SPECIFICATIONS

MODEL HC-1

The AEG Model HC-1 is a heavy duty cage designed to be installed over top of a paging horn, or other device that will physically fit, protecting it from objects like a basketball. The cage shall be fabricated from 1/4" (6 mm) steel bar stock, then plated with a bright zinc plating. The Cage shall measure 17" (432 mm) square at the base, 15" (381 mm) square at the front, and 15" (381 mm) deep. The HC-1 shall mount to the surface with 1/4" lag bolts or equivalent suitable hardware, which is not included. This cage is suitable for indoor or outdoor applications. The cage shall be used wherever a paging horn or other device requires protection, such as a school yard or gymnasium, a recreational center, a prison court yard or common area, any commercial application where the device requires protection. The model number shall be AEG HC-1.
