- 4 COMBINATION KNOCKOUTS PROVIDED
- NO MOUNTING BRACKETS ARE SHOWN ON THE SIDE OF THE BACK BOX

SE24 (1 CU. FT. ROUND)

SE33-12 (3 CU. FT. SQUARE)

ARCHITECT'S AND ENGINEER'S SPECIFICATIONS

MODEL SE24 / E35-15

The speaker enclosures shall be AEG Model SE24 / SE35-15 or approved equal. The back boxes shall be manufactured of 18 gauge cold rolled steel and shall have four 1/2" to 3/4" IPS electrical knockouts 90 degrees apart. The enclosure shall have a volume of 1 / 3 cubic feet and the interior shall be loaded with 1 1/2" thick fiberglass with 1 1/2 lb./cu ft. density. This SE33-12 back box is lined with acoustical board for better sound deadening properties. The removable front panel on the SE33-12 shall have an integral baffle mounting flange. The finish shall be black baked enamel electrostatically applied over steel which has been prepared with an iron phosphate coating prior to finishing. This back box is used with 8"(SE24) OR 12"(SE33-12) speakers only(Optional). Back Boxes shall be used wherever a surface mounted, high quality, wide frequency response, high powered speaker system is installed. Typical installation requirements are high ceiling, larger space, better quality.

Grills(baffles) that are compatible with these back boxes are AEG Models G10W, G11W, G11A & G24W(SE24) or G51W-12(SE33-12).
